Linda's AP Java Website/Portfolio Project - Additional Information
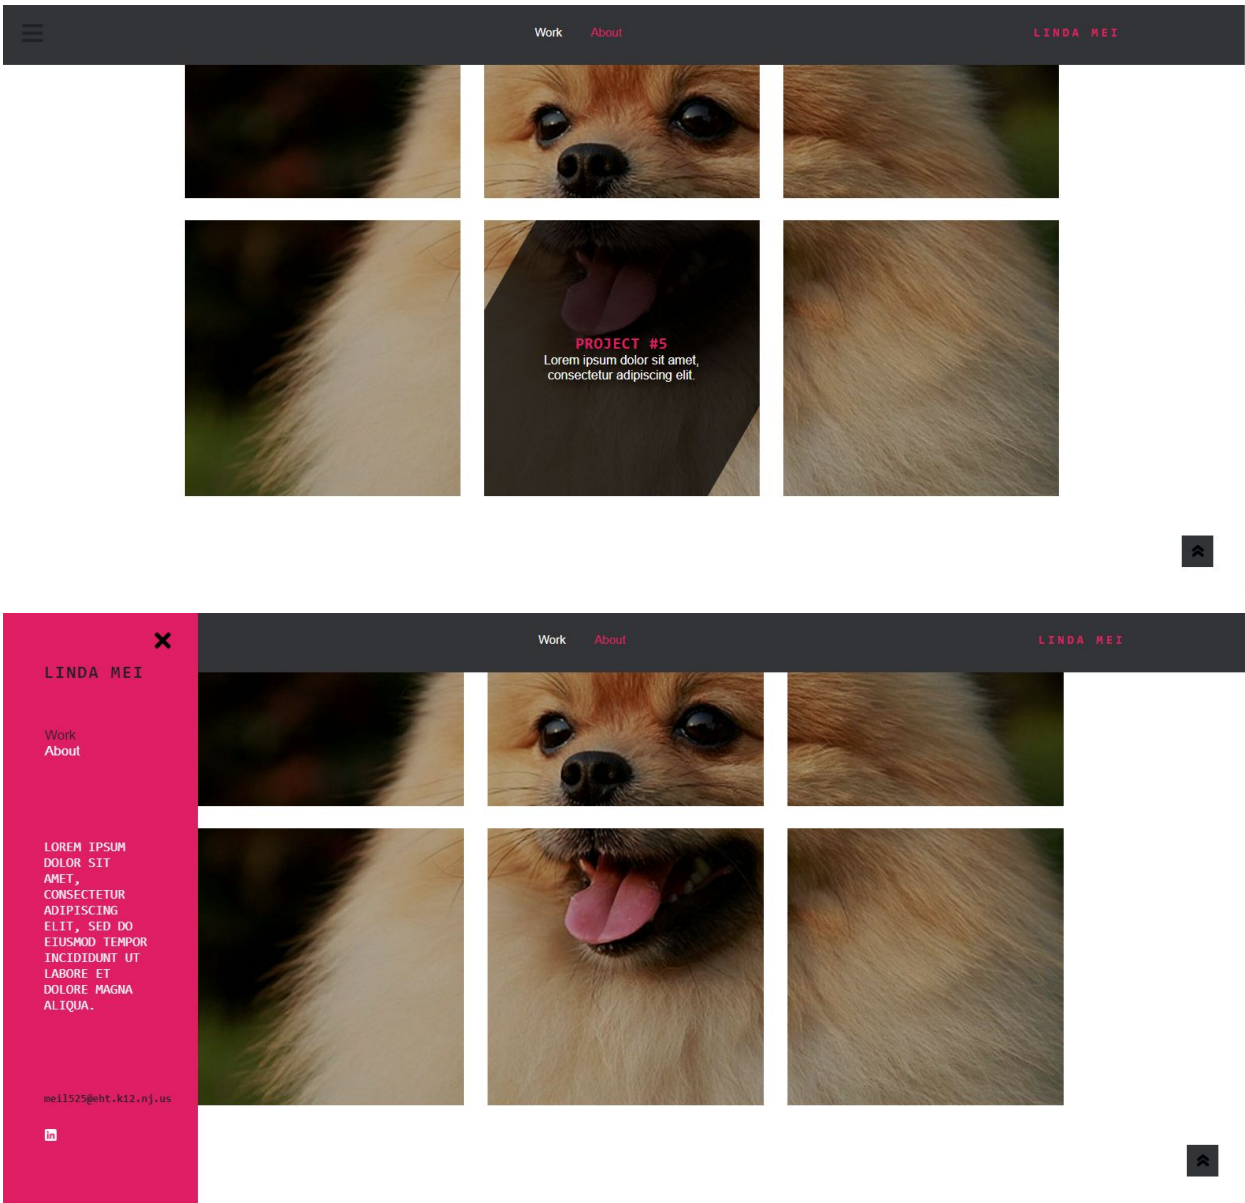

Instructions to view the website (locally)
1. Download the compressed file and extract the file to the folder, "AP-Java-Website-Linda-Mei"
2. Open the folder and right click "index.html" file and open with "Google Chrome."
3. You can also right click on "index.html" or "about.html" or "style.css" and open it in a text-editor or on Notepad to view the HTML/CSS
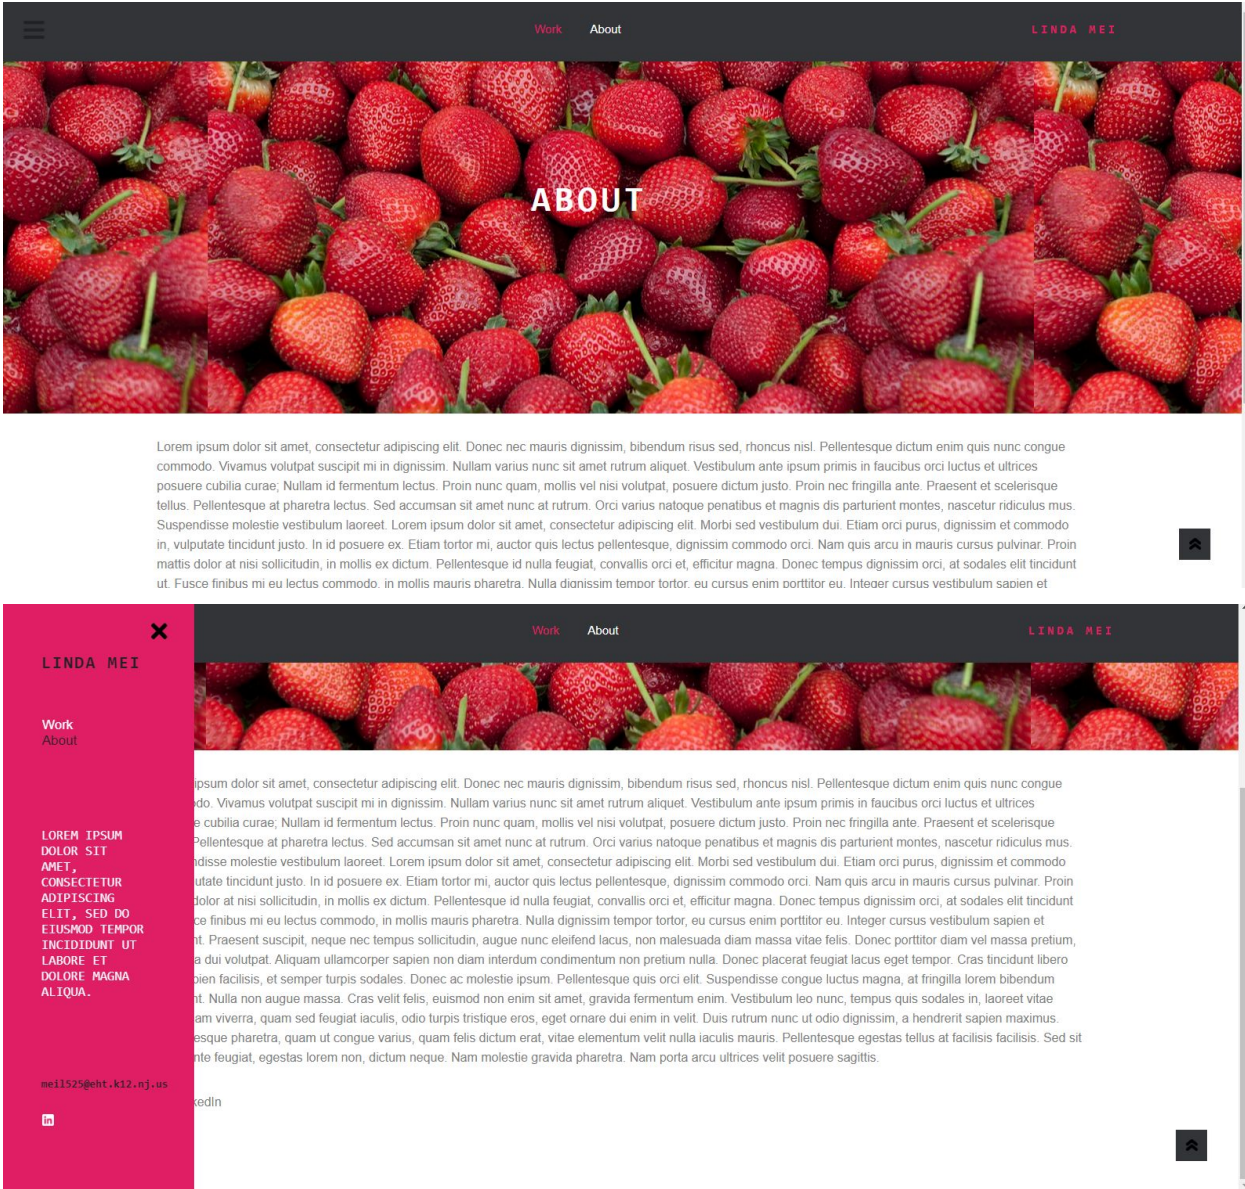

Log
- Work Page
  - Logo is set to the right side of the website
  - Disabled user selection for certain texts (Logo,
  - Text is set to uppercase, text and word spacing
  - Animated changing texts (6)
  - Added 3x2 boxes as a simple portfolio with hover animations
    - images inside can be changed
  - Added a fixed return to top arrow with smooth scrolling up to the top
  - Added a sticky nav bar that is fixed with scrolling, nav links are displayed inline
  - Added color changes when hovering over texts
  - Added an active color to navbar and side navbar when the user is on the page selected (if on "Work" page then the nav color is set to white/black for Work for navbar and side navbar respectively)
  - Added a sidebar button that fades out while changing color to pink
  - Added a sidebar exit button that transitions to the left along with the sidebar when clicked
  - Added lorem ipsum filler text for the "welcome" message and "additional contact information" in the sidebar
  - In the sidebar, the side navbar, email, and LinkedIn icon will get scale larger and/or change color upon hovering
  - Added a custom Favicon and pomeranian pics in the 3x2 boxes.
  - Increased the height of the pages to test for smooth scrolling
  - Added appropriate font sizes, fonts, and etc.
- About Page
  - *Most of the basic implementations in the Work page are re-used again in the About page*
  - Added background behind the about text, image repeats
  - Added a color change when hovering on the About header
  - Added lorem ipsum filler text for the about information
  - Added LinkedIn icon and LinkedIn link, displayed inline

**htmlcheatsheet, csscrashcourse, and mywebsite (folders) are the notes I took while learning HTML and CSS through Traversy Media's HTML and CSS Crash Course videos on YouTube. I watched additional YouTube tutorials (12 that I found useful), and referenced pages for designs/layout ideas. Images and text serve solely as placeholders. Also, not sure if I forgot to list some stuff in the log
